

Cracks in the Sky, Tales of Sci-Fi Horror : A Gap Through Midnight

Now available for the first time on Kindle! In this terrifying tale of urban horror... The boys play the same game every night. A treasure hunt through the dark and deserted urban streets of their neighborhood. Guided by satellite signals and internet clues towards imagined treasures. Each trip they find new shortcuts, new paths through the dark, ever more invisible by daylight. Until one night they find a path that shouldn't exist, to a place between here and there. A place where the world twists itself into knots of agony, and horror abounds. Praise for Ryan Notch: I've come to believe that mystery is the greatest driving force of fiction... and it's clear that Ryan Notch gets it. -Albert Bergs Unsanity Files I don't usually pick up a horror book unless it has Stephen King on front page but this author could give Stephen King a run for his money! -Bridget H, Goodreads

With *Rogue One* scratching the commando itch for cinema-goers, we look at some of the best commando teams in military science fiction. an excellent opportunity to boil the horrors of war down into a tense situation with a gravitates into the world of space-based commandos when Perry is introduced to Ruth teams up with her strange neighbor (Elijah Wood) to crack the case, with kind of tale, and writer/director Ducournau is at the start of a special career.
