

The Green Rust

[...]pheasants in the early days of his occupancy of the Lodge on the hill. As Kitson entered one side of the plantation he heard a rustling noise, as though somebody were moving through the undergrowth. It was too heavy a noise for a bolting rabbit or a startled bird to make, and he peered into the thick foliage. He was a little nearsighted, and at first he did not see the cause of the commotion. Then: I suppose I'm trespassing, said a husky voice, and a man stepped out toward him. [...].

The oxidation of $\text{Fe}(\text{OH})_2$, by slow air bubbling, can lead to the formation of oxyhydroxides. In sulphate medium the following succession was observed: $\text{Fe}(\text{OH})_2$ Mossbauer and Raman spectroscopies are used to identify for the first time a green rust as a mineral in a reductomorphic soil from samples extracted in the The rusts green (fougerite) is an unstable iron compound. Fougerite is a natural rock, whereas the green rust is a product formed by a metal corrosion. MADE IN ENGLAND Printed in Great Britain by Butler & Tanner Ltd., Frorae and London. page. CONTENTS.
